## EXPERIENCE

### TRACTIAN

Remote

Frontend Software Engineer

July 2024–Present

- Built [Metrics V2](#) from the ground up and continue to own its **architecture, scalability, reliability, and evolution**, establishing it as a **production-critical capability shared across multiple product modules**.
- Owned core pages of the [OEE](#) MVP end-to-end, **partnering with Product, Design, Backend**, and customer-facing teams to deliver under a **critical deadline** for one of the **company's largest clients**.
- Built the Variant Library, a **platform-wide experimentation system** combining **A/B testing, feature flags, and analytics tracking**, enabling teams to **measure customer behavior** and standardizing how new product experiences are validated.
- **Optimized a data-intensive [microfrontend](#)** using table virtualization, intelligent data fetching, and optimistic updates, **reducing render time by 35% and client-side errors by 85%**.
- Built Geolocation, a real-time technician and asset tracking system **showcased to investors** during the company's [\\$120M in Series C](#) fundraising process.
- Extended **backend** endpoints on the BFF layer (Node.js) to refactor business rules, enabling a new product capability that **unblocked a critical enterprise customer deal**.
- Established the frontend platform's first **testing standard** and **added 700+ Vitest tests** across schemas, repositories, and domain logic, **increasing confidence in refactors** and **creating a scalable foundation** for automated test generation.
- Drove **AI tooling** standardization across the 20-engineer frontend team, building reusable workflows, **Cursor** rules, **Claude Code** skills, and **Jira** automations that embedded **AI** into the team's daily engineering practices.
- **Skills:** React, TypeScript, TanStack Query, Vitest, Jest, Tailwind CSS, AG Grid, Highcharts, Sentry, PostHog, A/B Testing.

### PLIN energy

Maringá, Brazil

Frontend Software Engineer

May 2023 - July 2024

- **Led a team of four engineers** through technical planning, milestone coordination, and code reviews, delivering all major features on schedule while **reducing deployment issues by 40%**.
- Architected migration of 8 frontend apps from Heroku to AWS, which **reduced infrastructure costs by 75% and improved app reliability across all products**.
- Built a Next.js PWA for [solar energy tracking](#), which is **used by 500+ daily active customers and increased bill payment completion rate by 35%**.
- Built a **reusable and accessible design system** with ShadCN, Radix UI, and Storybook, **accelerating feature development and ensuring consistent implementation** of the design team's standards across products.
- Built **CI/CD pipelines** with GitHub Actions and automated **unit, integration, and end-to-end testing** with **Jest and Cypress**, **reducing production bugs by 30% and cutting QA cycle time by 50%**.
- **Skills:** React, Next.js, TypeScript, JavaScript, Astro, React Query, Tailwind CSS, shadcn/ui, CI/CD, Jest, Cypress, Storybook, AWS (CloudFront, S3, Route53), Heroku, React Hook Form, Next Auth, Context API, Zustand, Jotai

### Freelance

Maringá, Brazil

Frontend Software Engineer

2022 - 2023

- Developed responsive landing pages and reusable UI components, which **improved client site performance by 40% and reduced development time for future features**.
- **Skills:** React, Vue.js, React Native, JavaScript, TypeScript, Expo, Node.js, MongoDB, Git, Bootstrap, HTML, CSS

## BEYOND WORK

- **Technical blogging** on [renanleonel.com](https://renanleonel.com). I write technical articles about what I learn.
- **Open-source contributions** on [Astro](#) and [PostHog](#).
- **C1 Advanced English** certified by Cambridge University.

## EDUCATION

- **Specialization, Distributed Software Architecture**, PUC Minas, Brazil. **2023–2024**
- **Bachelor of Science, Computer Science**, State University of Maringá (UEM), Brazil. **2019–2023**
